MOONLIGHTING SOLUTIONS

A New Answer to an Old Problem

Moonlighting Solutions is a physician-owned and operated company that specializes in providing weeknight and weekend call coverage for practices and hospitals. We cover primary care and almost all medical/surgical subspecialties. Whether you are looking for coverage for a single shift per month or seven nights a week, Moonlighting Solutions has options for you. We provide US-trained BC/BE (Board Certified/ Board Eligible) physicians to meet your staffing needs, utilize online scheduling through a password-protected portal on our website, offer medical malpractice insurance (with full tail) at discounted group rates and assist with credentialing. Moonlighting Solutions also provides 24-hour trouble shooting assistance via an on-call pager.

Increase Productivity and Decrease Physician Burnout

Adopting a call-coverage program will allow your practice to return its partners back to the hospital and office during the day so you can maximize your practice's productivity and grow your outreach efforts. It also relieves your partners of the most onerous part of their jobs: night and weekend call. Without night or weekend call responsibilities, most partners can extend their careers five to ten years, maintaining their patient base and reducing the need for your practice to recruit new partners. With one phone call, Moonlighting Solutions can design a call-coverage program to meet the demands of your practice.

Rest Assured

When you work with Moonlighting Solutions you have instant access to our extensive nationwide database of outstanding, academically-trained medical personnel. We can help you develop a night and weekend float team for your practice. Our entire staff of physicians goes through a rigorous vetting process and has a record of safety. With Moonlighting Solutions you can rest assured knowing that your patients benefit from the same high level of care they receive during normal business hours. What's more is that working with Moonlighting Solutions provides your practice with a built-in recruiting tool to attract the best, brightest and hardest-working young physicians to your practice.

Our Background

In 2001, Dr. Dan Bensimhon began developing an innovative program to cover weekend call for a cardiology practice in North Carolina. The program was designed to increase the daytime productivity of the practice's partners, improve their quality of life and prolong their medical careers while still providing the highest quality-of-care to the practice's patients. When the practice was pressed to provide more outreach services in an ever-expanding market, the call coverage was extended to seven nights per week freeing up the practice's physicians to see more patients and develop new markets without hiring additional partners. The call program not only paid for itself but managed to generate a substantial profit within the first year by increasing partner productivity and job satisfaction.

Based on this concept, Moonlighting Solutions was founded in April 2007. Moonlighting Solutions now provides call coverage services to practices and hospitals all across the county.

Contact Moonlighting Solutions for a Free Proposal

Contact Moonlighting Solutions at info@moonlightingsolutions.com or call 800-807-7380 and with some basic information on your practice's needs and call volumes, we can quickly will put together a detailed proposal for a call-coverage program designed specifically to meet your practice's needs.
